

JOIN US FOR THE 7TH CONFERENCE ON BENEFICIAL MICROBES

JULY 8 - 11, 2018 | MADISON, WISCONSIN

UWMADISON.EVENTSAIR.COM/BENEFICIALMICROBES/18

Starting with the first meeting in Seattle in 2001, the Beneficial Microbes Conference has an impressive history of showcasing cutting edge science on host-microbe interactions from diverse host systems and scientists. For its seventh iteration, the Beneficial Microbes Conference will move to an academic campus location, allowing for a more affordable meeting. We encourage established and new investigators and trainees to submit abstracts for oral and poster presentations.

Planning Committee

Karen Guillemin, University of Oregon
Mark Mandel, University of Wisconsin
