Rod A. Rahimi, MD, PhD

*Assistant Professor of Medicine – Harvard Medical School
Assistant Physician – Massachusetts General Hospital*

**Post-Doctoral Fellow Position Available
Rahimi Laboratory**

The Rahimi laboratory in the Center for Immunology and Inflammatory Diseases at Massachusetts General Hospital and Harvard Medical School is seeking a post-doctoral fellow to study Th2 cell biology in the context of allergic disease. We are interested in understanding the role of lipid metabolism and signaling in regulating Th2 cell differentiation and function in vivo.

We seek a highly motivated post-doctoral fellow (PhD, MD/PhD, or MD) with a background in immunology. International candidates are encouraged to apply. Experience working with mice, flow cytometry and/or advanced microscopy is required.

The Rahimi laboratory is funded through the NIH, American Lung Association, and institutional awards. This is a fully-funded position and project that provides an excellent opportunity to work in an exciting area within a dynamic, collaborative, and supportive group. Interested applicants should email their CV, a description of research accomplishments, and the names and email addresses of three references to: rrahimi@mgh.harvard.edu.
